## OBJECTIVE

---

As an aspiring backend developer with a solid foundation in web technologies, I am now focused on building scalable, efficient systems using **Go (Golang)**. I am seeking a backend-focused full-time job where I can develop my understanding of server-side development, microservices architecture, and API design using Go, while contributing to real-world projects in a collaborative engineering environment.

## EXPERIENCE

---

Junior Front End Developer

Asian It Inc. [June, 2024 - Sep, 2024]  
Sirajgong, Bangladesh

- Worked as a Junior Front-End Developer during my internship, contributing to the development of various websites such as E-commerce platforms, Agency website, Portfolios, School management dashboard panels, Medical websites
- Utilized modern technologies such as JavaScript, ES6, React.js, Next.js, Tailwind CSS, and Framer Motion.
- Developed dynamic interfaces and delivered high-quality web solutions tailored to client needs.

## SKILLS

---

- **Backend :** Golang, TypeScript, Express.js.
- **Frontend:** React.js, Next.js.
- **Databases & ORM:** PostgreSQL, MongoDB, Mongoose, Prisma.
- **Web Services:** REST & RESTful APIs.
- **Tools & Software:** VS Code, Git, GitHub, Postman and Docker.

## PROJECTS

---

- **Full-Featured E-commerce** | [Github Link](#)
  - Authentication & Authorization, Role-based access - Admin, Customer, Guest.
  - Developed RESTful APIs for core features including user profiles, products, cart, wishlist, orders, reviews and ratings.
  - **Technology Used:** Golang, PostgreSQL
- **University Management System** | [Github Link](#)
  - Built a scalable University Management System backend using Express.js and TypeScript, supporting secure authentication and role-based access control for students, faculty, and admins.
  - Designed and developed RESTful APIs for core features including user management, academic operations (course enrollment, grading, semester management), and profile handling.
  - **Technology Used:** Express.js, TypeScript
- **Real Estate Project** | [Live Link](#) | [Client Side](#) | [Server Side](#)
  - A responsive real estate platform showcasing properties with a featured section, latest listings, detailed property pages and a search bar for quick property searches.
  - Includes an admin dashboard for managing listings, users, and updates.
  - **Technology Used:** Express.js, TypeScript, Next.js.

## LANGUAGE

---

- Bangla(Native), English(Fluent)
